

In light of the subject proceeding, I'd like to tell you how much our local K-Love radio stations mean to my family and this community. My wife and I began listening to K-Love on 104.3 FM and 102.3 FM in the Cincinnati area about 3 years ago, and now rarely listen to anything else. Not only does K-Love provide the kind of music and programming that inspires and uplifts, but it provides something I believe is even more vital: a place on the radio dial for our children to listen without us having to worry about what they might hear! I can not stress enough the importance of this point! Even the most "tame" regular, commercial-laden FM and AM stations in this area have, from time to time, material on the air to which I don't want my children exposed. It's comforting to know that they can listen to K-Love with us in the car, or at home in their rooms, and will not be exposed to the sexual innuendo (and outright brazen sexuality) on most stations. They now ask us to tune our radios to K-Love, and sing along with many of the songs.

If we were to lose access to K-Love, it would mean a life without popular music for our youngsters, as we will not allow them to listen to the popular local FM stations. The deejays and the "commercials" made by the on-air talent at these stations are offensive to most adults, let alone appropriate for young ears!

For this reason and many more, it is vital to the interest of this community to keep our K-Love frequencies intact. I'd like it if they were allowed to expand even more, so that they're never out of range when we take family trips. Parents need stations like K-Love so they may show their children there are great alternatives to the sex & crime-laden, disrespectful music lyrics that are found all over the regular airwaves.

Thank you for your kind consideration.

Regards,

Tom Sprockett
